Ode to the Cosmos	i
Preface	iii

Part One

Our Context

1 The Challenge of Our Potential	1
Who are we – really?	2
Our web of possibilities	4
What is life?	6
Misconceptions and limiting beliefs	12
Our challenge	16
2 The Myth of Scarcity	19
The dynamic of entitlement	20
The concept of scarcity	21
The limiting dynamic of fear	24
“More is better”	26
Abandoning a belief in scarcity	30
3 Having Enough	33
Defining enough	34
Less is more	38
Maximizing well being	39
Re-examining our values	43
Moving beyond a sense of entitlement	47

Part Two

The Principles of Our Universe

4 The Principle of Interconnectivity	51
The nature of energy and matter	52
Non-local connectedness	56
The limiting belief of separateness	59
Living as part of an interconnected group	60
Uniqueness and interconnection	63

Managing our energetic connectedness	69
5 The Principle of Participation	71
Managing the mist of possibilities	72
The role of perception	73
Visualization and its contribution	76
Attention and focus	78
Intention's potential	80
Detachment embraced	83
Managing our participation	86
6 The Principle of Nonlinearity	87
Time as relative	88
Changing over time	92
The limiting belief of linearity	94
Interacting with time	96
Embracing nonlinearity	98
7 The Principle of Nonduality	101
The fallacy of duality	102
Options as a continuum	104
Options as multi-potentiality	107
The role of contrasts	108
Addressing gender role stereotypes	109
Moving beyond duality	117
8 The Principle of Interdependence	119
The nature of interdependence	120
Valuing other life forms	123
The limitations of anthropocentrism	130
Shifting from resources to relatives	132
Addressing service role stereotypes	135
Enhancing our interdependence	138
9 The Principle of Adaptability	141
Adaptability and survival	142
Working with points of tension	145
The role of anticipation	149
Embracing adaptability	151
10 The Principle of Cooperation	153
The matter of self-interest	154

The myth of competition	157
Symbiosis and cooperation	158
Cooperation and the common good	162
Tools of cooperation	165
Developing a constructive symbiosis	169

Part Three

The Implications

11 Learning What We Need to Know	173
Identifying presuppositions	173
The danger of dichotomies	180
Applying new concepts from quantum physics	181
Applying new concepts from life sciences	182
Remaining open to change	182
12 Becoming Cosmic Citizens	185
The meaning of cosmic citizenship	185
Rights and obligations	186
Relating with respect	189
The keynote of joy	192
Embracing our role in the cosmos	194
Appendix: Declaration of Interdependence	197
Notes	199
References	213
Index	223
List of Exercises	233
